

Wraptor A6200 Wrap Printer Applicator Additional B-417 Consumables

Harshest environment automated cable and wire identification with B-417 label options on the Wraptor A6200 Wrap Printer Applicator

- Thanks to the extra strong-adhesive, labels show high performance in harsh environments, on small diameter wires and on smooth cable surfaces
- Automate wire ID for increased speed, accuracy and reliability at reduced cost
- Compact and light weight the A6200 design allows for use in cellular manufacturing environments

Brady is launching the B-417 self-laminating labels with extra-strong adhesive, ideally suited to apply on small diameter wires and cables for use on the Wraptor A6200 Wrap Printer Applicator

The B-417 labels continue to strengthen Brady's self-laminating marker portfolio and keep wire identification secure even in harsh conditions where a high level of adhesion is needed.

Material use

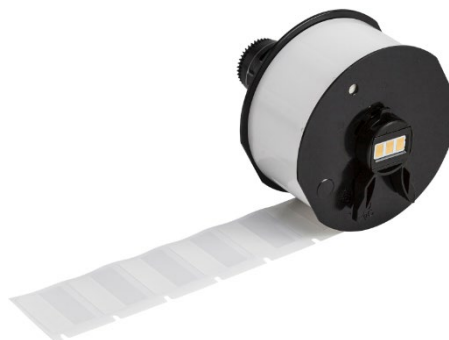

B-417 self-laminating labels can be used for wire and cable identification in several markets including Datacom-Telecom, Electricity-Power and Manufacturing.

B-417 secures cable and wire identification in harsh environments, on small diameter wires and on smooth cable surfaces (e.g. silicon, teflon)

Overview of new consumables

These parts will be available for shipping by end of May 2021.

Article number	Description
152200	A62-1-417
152201	A62-14-417
152202	A62-15-417
152203	A62-3-417

All references will be added to Product Discount Group BV (Automation consumables).

With this introduction, the **Wraptor A6200 Wrap Printer Applicator** offers automated cable and wire identification with the following material options:

- **B-427** - Self-laminating wire marker features white printable area with a clear tail that wraps around the marker. The tail serves as overlamine to protect the print. Superior resistance to abrasion, solvents, water, oil and dirt.
- **B-417** - Self-laminating wire marker features white printable area with a clear tail as overlamine protecting the print. Ideal for smallest diameter wires and on smooth cable surfaces.
- **B-499** - Nylon cloth with permanent adhesive allows labeling in environments with heat, cold, oil and dirt.

More information for each label material is available in the dedicated technical data sheet:
